

# AquaPure™ T-500

Aquapure T-500 is a Sodium Dithiocarbonate solution ( $\text{Na}_2\text{CS}_3$ ) designed for use as an efficient metal precipitant. Aquapure T-500 provides an alternative product that is less toxic to aquatic species than some of the diethyldithiocarbamates. In addition, the volume and weight of sludge per unit of metal precipitates is substantially less than alternative products including the dithiocarbonates for selected metal types.

## Features & Benefits

|  |   |
|--|---|
| Ready to use liquid                            | Easy to meter into continuous flow or batch systems |
| Less toxic than traditional metal precipitants | Direct discharge approved                           |

## Physical Data

|                              |                       |
|------------------------------|-----------------------|
| Active ingredients, % purity | 24.0 – 26.0           |
| Specific gravity (20°C)      | 1.20 g/mL (10 lb/Gal) |
| pH, as received              | 13.0 minimum          |
| Color                        | Clear red             |

## Caution

Aquapure T-500 is a corrosive liquid (UN3266) and should be handled carefully. See SDS for reference.

Aquapure T-500 should be stored in a location that avoids extreme temperatures.
